ABOUT ME

I am a web developer passionate about innovation and constantly on the lookout for the latest programming methods and emerging trends to enrich my skills. With a strong creativity and a proven ability to work simultaneously on several projects, I am able to meet the most demanding requirements on each project.

WORK EXPERIENCE

Salesman, KEY MONEY LTD, Port Louis
Dec 2019 - Aug 2021

I started my career at KEY MONEY LTD as a part-time employee during school vacations. After graduating, I was fortunate enough to be hired as a full time salesperson at this company.

My main responsibilities were to sell electronic products such as phones, televisions and video games, while providing personalized and knowledgeable service to customers.

During my experience, I gained a solid knowledge of the products and a good understanding of the customers' needs, which allowed me to consistently meet sales goals. I was also able to negotiate to establish and maintain positive customer relationships, contributing to the company's customer growth.

In collaboration with team members, I shared product knowledge and best practices to improve overall team performance and achieve common goals.

My experience at KEY MONEY LTD has allowed me to develop my sales, negotiation and customer service skills, as well as my ability to work effectively in a team environment.

Web designer, linkeo, Quatre-Bornes
Aug 2021 - Present

I worked as a web developer for various clients, collaborating with project managers and developers to gather requirements and ensure timely delivery of projects. The company was based on productivity and quality.

I specialized in updating websites for clients using their custom framework called "ideo3" which they created themselves. For task management and workflow optimization, I worked with the Jira framework.

I am also skilled in creating web pages with HTML, CSS, JavaScript/jQuery, making sure the design is responsive and compatible with different browsers. I also participated in the testing and debugging phase to ensure high quality and performance.

During my time at the company, I had the opportunity to work in collaboration with other departments, especially the SEO department. During my 1.5 years of experience, the collaboration with my colleagues has allowed me to grow in this area.
